

Ethan Cheng

ethanc12@berkeley.edu | 626-841-0678 | www.linkedin.com/in/ethancheng12 | Arcadia, CA

Education

University of California, Berkeley	Graduated: May 2025
B.S. Data Science (Emphasis in Urban Science)	Cumulative GPA: 3.65
Relevant Coursework: Techniques of Data Science, Data Engineering, Data Mining & Analytics, Probability for Data, Linear Algebra, Geographic Information Systems, Economics, Urban Planning & Transportation, Artificial Intelligence, Statistics	

Professional Experiences

11:11 Systems	Remote
Business Analyst	May 2025 - Present
- Deliver data-driven financial insights from Oracle and Qlik systems, influencing multimillion-dollar budgeting decisions - Streamline procurement process through SQL querying and advanced Excel analytics, strengthening forecasting accuracy - Produce executive-ready reports identifying inefficiencies and optimizing cost-savings strategy for 1000+ client contracts	
American Bankers Association	Washington, D.C.
Marketing Data Intern	February 2024 - August 2024
- Devised data-driven strategies to address evolving market; boosted revenue and attendance at flagship annual conference - Employed Salesforce and Domo for data analytics and BI; developed dashboards and forecasts to substantiate insights - Pioneered projected \$2.2M revenue growth and 30% attendance increase through proposed targeted marketing campaign	
JEC Customs Brokerage	El Monte, CA
IT Data Analyst	December 2023 - May 2024
- Engineered new website and handled drawback requests for 3,000 unique entries, processing over 54,129 individual items - Utilized Excel features such as pivot tables, Macros, and VBA, along with SQL for database querying and data processing - Leveraged Tableau dashboard visualizations to provide data analytics and successfully refunding \$30,625 for the company	
Meta Mercedes Benz	Menlo Park Sunnyvale, CA
Product Growth Consultant (Contract)	January 2023 - December 2023
- Developed strategic recommendations for WhatsApp Flows, identifying 19 potential partnerships in developing countries - Constructed slide deck deliverable with fellow analysts to conceptualize final business strategies and actionable solutions	

Projects

Data Analysis Roster Optimization USOPC Gymnastics Competition	Berkeley, CA September, 2023
- Meticulously preprocessed data, implemented advanced feature engineering, and crafted predictive linear regression model - Thoroughly trained, tested, and validated model using advanced cross-validation techniques, ensuring robust performance - Identified optimal team compositions poised for gold medal success in the 2024 Paris Olympics USA Gymnastics Team	
Metamaterials Neural Network Researcher Data Science Discovery Program	Berkeley, CA August, 2023
- Trained graph-based neural networks utilizing PyTorch framework to predict intricate 3D architectures of metamaterials - Employed Optuna for precise hyperparameter fine-tuning, and utilized Docker for streamlined model deployment - Leveraged cluster computing for streamlined processing of large datasets, enhancing project efficiency and performance	

Extracurriculars

Vice President of Operations Berkeley Phi Beta Lambda	Berkeley, CA September, 2022 - May 2025
- Champion team of collegiate student analysts in partnership with conglomerate businesses providing consulting services - Automate Excel sheets and streamline technical operations across club functions to optimize efficiency and accuracy	
Data Analyst Sports Analytics Group at Berkeley	Berkeley, CA September, 2023 - May 2024
- Query large datasets using SQL to extract performance metrics and trends, supporting data-driven recommendations - Present 10-week project findings through a comprehensive final deliverable deck, incorporating built data visualizations	

Skills & Interests

Skills: Data Visualization, Machine Learning, ArcGIS Pro, Modeling, Probability, scikit-learn, Tableau, Git, Docker, Power BI, Excel, Google Microsoft Suite, Figma, VSCode, Salesforce CRM, Domo, Nimble AMS. Other: English, Cantonese, Mandarin
Programming Languages/Libraries: Python, Java, SQL, HTML, CSS, Javascript. Pandas, Seaborn, Matplotlib, Numpy, PyTorch
